

Due to the evolution of threats and the reactive nature of product updates, it is increasingly difficult for IT Departments to maintain the internal skills, experience and resource necessary to address their network security. Business continuity is a critical issue for all corporate IT Managers and Softcat Security specialises in providing solutions based around pre-sales consultancy, our professional implementation and integration services and our internal support centre, to ensure the ongoing protection of your business assets.

Our Approach

Through our technical ability, project management skills and professional services, we ensure clients' networks deliver business critical applications both securely and efficiently. From initial project scoping through to complete systems management, our security consultants deliver solutions for every phase of assessment and implementation, maximising business benefits. Our proactive and knowledgeable approach to processes enables our services and solutions to be delivered inline with your business needs and existing IT infrastructure.

OUR MISSION - 'To be trusted advisors for the design, implementation and support of integrated security systems'

"Softcat consistently demonstrate their commitment to both Websense and their customers through their focus and understanding of the security market. Softcat truly provide 'value-add' in terms of presales support, a thorough technical understanding of the Websense solution, and customer service and we are very pleased to have them as part of 'The Team'".

SARAH GOODCHILD
Channel Manager, UK
Websense

"Softcat is an accredited and valued partner to Check Point. They are one of the few resellers in the country that Check Point can trust to sell and support our products. Softcat always delivers the value add Check Point demand from their partners."
