

MICROSOFT 365 SECURITY ESSENTIALS IMPLEMENTATION SERVICE

Kick-starting your Microsoft 365 security position, aligning with industry best practice standards.

HOW DOES THE SERVICE WORK?

We have developed our Microsoft 365 Security Essentials Implementation Service to kick-start the security position of your Microsoft 365 environment. We ensure it is configured to best practice set by Microsoft, Softcat and the Centre for Internet Security (CIS). The service is available in two versions, aligning with Microsoft 365 licences – standard and advanced.

The standard service looks at Conditional Access, user login security and Azure AD management as well as Mobile Application Management, Data Loss Prevention and Microsoft Information Protection. The advanced service looks at Privileged Identity Management and Identity Protection as well.

BENEFITS TO YOU

People

As more companies move to utilising online services, keeping users' identities secure is becoming the highest priority. As part of this service, we will configure user login security features such as MFA and Conditional Access to ensure your users stay safe.

Technology

Data has become the most important commodity for a lot of organisations and utilising services such as Data Loss Prevention and Microsoft Information Protection allow us to help you protect that data within your own Microsoft 365 environment.

Commercials

During this engagement we will implement security services and features which are part of your existing Microsoft 365 licenses to ensure that you are making the most of your investment.

The Microsoft 365 Security Essentials Implementation Service is available in two versions that align with the Microsoft 365 licences available.

	Standard E3 licensed features	Advanced E5 licensed features
Global Administrator and privileged account best practice	✓	✓
Guidance on deprecating legacy authentication protocols	✓	✓

SUITABLE FOR YOU IF...

- ✓ You are an existing Microsoft 365 E3/E5 or EMS E3/E5 standalone customer or if you have purchased the E5 security add-on. It will provide particular value to those new to the service or upgrading from Office 365 standalone.
- ✓ You are concerned about the security of your Microsoft 365 environment.
- ✓ You are looking to kick start your security position.
- ✓ You'd like an expert security baseline to build on.
- ✓ You want to make the most of your existing Microsoft 365 investment.

WORKS WELL WITH

Microsoft 365 Security Assessment

Providing an audit of your Microsoft 365 and Office 365 environments against industry security benchmarks.

Microsoft Teams Advisory service

Helping your organisation get the most out of Microsoft Teams, so your users can collaborate effectively.

Azure Security and Health Assessment

Ensuring your Azure environment is secure and running efficiently by identifying potential security risks and cost savings.

WHAT'S INCLUDED

Flexible configuration – We can come to you, or provide remote configuration, implementing security features against Softcat, Microsoft, and CIS best practice.

Expert guidance – You're in safe hands with our expert technical consultants.

Tailormade solutions – We work with you to understand your business objectives to ensure a successful implementation.

Proven advice – We hold several Microsoft Advanced Specialisations across Azure, Modern Work and Security, so deliver high-value solutions to customers.

Clear reporting – We provide a detailed handover report, allowing you to build upon the security foundations.
