

CONTROLS ASSESSMENT SERVICE

Helping you understand your security posture and providing remediation guidance throughout the year with a quarterly security controls assessment aligned to an internationally recognised framework.

CYBER SECURITY

HOW DOES THE SERVICE WORK?

Utilising our intelligent assessment portal and Softcat’s in-house cyber security assessors, we first conduct a review to set a security baseline, forming the Q1 assessment. From this we produce comprehensive reporting, giving you solutions to address the gaps in your security posture.

The subsequent quarters’ assessments document and recognise improvements, looking at the challenges faced during improvement activities and keeping your organisation accountable to objectives set out in the original assessment.

We provide data analysis around responses, helping measure success and demonstrate evidence of controls, as well as looking at common themes around why controls are not being operated. Finally, we show you the status of your risk posture, to understand your organisation’s end goal regarding the security framework.

BENEFITS TO YOU

People

Demonstrate where resource constraints are hampering security efforts and be able to evidence the successful controls operated by your teams.

Technology

Evidence the security platforms that are returning the most value into your security posture, providing a risk return on investment.

Commercials

Show the value of further investment made to address gaps in the security posture using ongoing assessments to demonstrate real world impact.

SUITABLE FOR YOU IF...

- ✓ You don't know your security posture.
- ✓ You want ongoing support during remediation.
- ✓ You want a partner to keep you driving change.
- ✓ You want to evidence your security posture to senior stakeholders.
- ✓ You want to centralise security compliance reporting.

WORKS WELL WITH

Managed SIEM Service

Reducing cyber risk by monitoring for, and detecting, security threats – enabling you to respond quickly, with guidance from cyber analysts.

SNOW Platform Service

If you choose to implement a SAM tool, why not let us take care of the required infrastructure such as backup, monitoring, hardware, updates and patches to drive and support adoption.

WHAT'S INCLUDED

Tailormade service – We listen to your business requirements and work with you to provide a service that meets your goals.

Expert guidance – We provide an in-house cyber security assessor to lead you through the engagement, on hand for any queries and available throughout each assessment and beyond.

ECAT access – Our intelligent ECAT portal is available to review your assets for simplified procurement.

Simple reporting – We build bespoke reports after each quarter's assessment to review improvements and offer further guidance and advice.
