

# ACHIEVE MORE, FASTER

## Optimise your Windows 11 migration with Softcat

Windows 11 promises a lot for the modern workspace – and Softcat is here to help you realise all that's possible for your business.

We'll explore four of our expert services in depth, so you can benefit from a stress-free migration that reflects your business' needs.

We can show you how to migrate to Windows 11 with confidence, putting together the pieces of the puzzle to create a perfect-fit solution of licensing, devices and support that's built around the unique requirements of your end users.

By championing every employee in every way they need, your entire workforce is set on the right path for success. It shows you're taking your responsibility as an employer seriously, empowering your people, while delivering maximum value from your technology investment.

**Read on to see how you can get more from Windows 11 with Softcat's services.**

## CLOSING THE LOOP ON A CIRCULAR ECONOMY

### Sustainability and your migration

Buying new devices means replacing old ones. And it's important both procurement and recovery are as sustainable as possible. That's why we extend the life of your old equipment through refurb and reuse.

Whether it's reuse within your business or resale elsewhere, we make sure you get a cost-effective return on your assets.

We collect, redistribute and dispose under our certifications, and provide onsite or offsite data destruction, so you can be confident your data remains secure. Our approved network of downstream recyclers also gives assurance that materials are placed back into the manufacturing process.

## RIGHT DEVICE, RIGHT TIME. EVERY TIME.

### Managing your device lifecycle

Give teams the devices they need, when and where they need them. Our Managed Device Lifecycle (MDL) service configures, tags and packages your new devices, accessories and equipment to your business' specs – from apps to accessibility. Then it's all sent in welcome boxes to home or local office addresses. It's a positive user experience from day one.

MDL removes the IT complexity of joiners, movers and leavers. We take on responsibility for every step of the build, deployment, accessibility configuration, warranty claims and recovery process. While you retain total control of stock and visibility.

That means fewer management overheads, less time, less effort and less stress. It gives you greater budget predictability, increased business agility and a level playing field for every employee – enabled by technology.

## FLEXIBLE WORKING, WITHOUT COMPROMISING CONTROL

### Making the most of modern management

Windows 11 supports new ways of working. From zero-touch deployment to granular reporting, enhanced security to proactive maintenance, we're here to guide your transition and empower your IT team.

By assessing your operational and technical objectives, we'll design the ideal endpoint management solution for you, tailored to your specific needs and focused on your core challenges.

Our approach removes the barriers to IT, providing visibility, support and security without impacting the user's device experience.

## REINFORCE YOUR SECURITY FOOTPRINT

### Implementing Microsoft Defender for Endpoint

Designed to catch all types of emerging threats and keep your business safe, Microsoft Defender for Endpoint uses next-generation protection. Integrating seamlessly with the rest of your Microsoft stack, its vulnerability management capabilities kick-start your Microsoft 365 security position.

Our experts offer the right skillset and knowledge to get the very best out of the solution, while saving you time. You may also be able to replace your existing anti-virus solution, offering an added cost saving to your organisation.

We can help you utilise more features from your Microsoft investment, modernise your endpoint protection, or consolidate endpoint security into a single management solution.

## YOUR WINNING COMBINATION

With Windows 11, you can reinvent your workspace, remove tech barriers and bring everyone along on your modern working journey. Intuitive and accessible user features with enhanced security give your people everything they want and need to succeed. And our best-in-class services can simplify and enhance your migration, providing you with specialist support that makes sure you're getting the best from Windows 11.

We understand that your business, people and processes are unique, and everything matters at every stage of the lifecycle. So whether you're at the discovery stage or making steady progress, through our services you'll get the expertise, knowledge and assurance needed to elevate your Windows 11 journey.

Level up your operations with Windows 11 and your migration with Softcat services.
