

MICROSOFT FUNDED WORKSHOPS, DELIVERED BY SOFTCAT

PROTECT & GOVERN SENSITIVE DATA WORKSHOP

DISCOVER RISKS FROM DARK DATA AND LEARN HOW TO ADDRESS THEM

WORKSHOP HIGHLIGHTS

-  **Understand** the hidden compliance risks of dark data
-  **Assess** your organisation's dark data risks with Data Risk Check
-  **Assess** your environment against key data protection standards and regulations
-  **Receive** an analysis and report on findings and associated risks
-  **Learn** about tools and services that can mitigate risks
-  **Explore** recommendations and next steps

Not long ago, managing data just meant dealing with documents and emails. Pervasive digital technology and the rapid shift to remote work have greatly expanded the information universe. Much of that data becomes stale or unused immediately after creation and contains information that could impose a compliance risk.

ADDRESS COMPLIANCE RISKS HEAD ON

Protecting information – wherever it goes – is critical to ensuring trust and meeting compliance requirements. But first, you need to know what data you have, where it is, how it's being used and compliance risks that may exist.

The Protect & Govern Sensitive Data Workshop gives you the insights you need to better discover, protect and govern your corporate data.

WHY YOU SHOULD ATTEND

As your business-critical data expands and your workforce shifts to remote work, having an integrated approach to mitigating and controlling privacy and regulatory risks is more important than ever.

By attending this workshop, our experts will work with you to:

- Document your compliance objectives and strategy including compliant Teams deployment and use
- Show how to understand, mitigate and protect against potential privacy and regulatory risks from dark data
- Demonstrate ways to accelerate your compliance journey with the latest Microsoft technologies
- Provide actionable next steps based on your needs and objectives

80% of corporate data is "dark" – it's not classified, protected or governed

– IBM. FUTURE OF COGNITIVE COMPUTING, NOVEMBER 2015

WHAT TO EXPECT

As part of the workshop, we will run a **Data Risk Check** which assesses your organisation's dark data risks. The **Data Risk Check** is the core activity of the **Discover Sensitive Data** workshop. It is spread out over several weeks to allow time to run on top of your cloud infrastructure, your surface privacy, and your regulatory risks in organisational data. **Data Risk Check** leverages automated **Microsoft 365** tools and services to discover data stored in the **Microsoft Cloud** and identify potential problem areas.

The automated discovery process will analyse your existing data for:

Sensitive information and intellectual property

Unused or "stale" data

Risky or suspicious activities

The Data Risk Check will identify privacy and regulatory risks in Exchange Online, SharePoint Online, OneDrive for Business and Teams, and can be extended with optional modules to scan on-premises data repositories and Windows 10 Endpoints.

By the end of this workshop, experts in Microsoft compliance will provide you with a:

Data Risk Check report that includes findings and insights from the automated discovery process

Clear look into Microsoft's approach to mitigating and controlling privacy and regulatory risks

Compliance Manager Tenant Assessment report with suggestions and top key improvement actions

Set of long-term recommendations on your compliance strategy, with key initiatives and tactical next steps

A list of recommendations and actionable next steps that will help mitigate the identified privacy and regulatory risks

WHO SHOULD ATTEND?

The workshop is intended for security decision-makers such as:

- C-Suite
- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- Identity and/or Application owners/decision makers
- IT Security
- IT Operations
- Security Architect
- Security Engineers
- Application business owners

WHY SOFTCAT?

When it comes to Microsoft, you need an experienced partner.

Softcat is a certified Microsoft Gold Partner, and our workshop facilitators are subject matter experts within the Microsoft 365 realm. With multiple Advanced Specialisations including Threat Protection, our experts bring a wealth of knowledge to the table, and will guide you to ensure that you achieve your full potential via the workshop.
