

CYBER ASSESSMENT SERVICE

Providing a flexible, ongoing assessment of your cyber security to mature and improve your stance.

HOW DOES THE SERVICE WORK?

We start by understanding your organisation's goals and drivers, then carry out assessments based on five key areas: technology; governance; people; process; and strategy.

We then develop a remediation programme to help you work towards operational excellence in cyber security. Our support is flexible and ongoing, typically covering 36 months, with quarterly or monthly assessments against best practice and bi-weekly calls and regular reports to monitor progress. We work closely with you to advise, design, supply and implement the associated technologies required to achieve your desired outcomes. With security risks constantly changing and evolving, it's vital to keep your security posture under continuous review.

BENEFITS TO YOU

People

Providing reassurance and an ongoing security transformation. We provide a flexible, bespoke service, working with your people and filling any skills gaps. This allows your teams to focus on driving the organisation forward.

Technology

We deliver an ongoing assessment of the entire security platform in operation, advising and designing improvements and maximising operations to achieve security objectives. This ensures that your infrastructure remains as secure as possible.

Commercials

Allowing a clear fiscal approach to achieving cyber security success, inclusive of compliance, architecture and services. Our assessment allows you to demonstrate the importance of your cyber security investment.

SUITABLE FOR YOU IF...

- ✓ You're looking to improve your cyber security posture and are unsure where to start.
- ✓ You have skills gaps in your IT team.
- ✓ You're looking for bespoke cyber security recommendations for your organisation.
- ✓ You want an ongoing focus on continuous cyber security improvement.
- ✓ You want to release your staff to focus on business objectives.

WORKS WELL WITH

Breach Assessment Service

Helping you understand the potential impact of a range of cyber-attacks, allowing you to strengthen your security architecture.

Governance, Risk and Compliance

Helping you meet regulatory obligations, address key risks, and ensure your information security strategy is aligned with your business objectives.

Managed SIEM Service

Reducing cyber risk by monitoring for, and detecting, security threats – enabling you to respond quickly, with guidance from cyber analysts.

WHAT'S INCLUDED

Ongoing assessment – We offer a tailor-made, ongoing assessment over 36 months, working closely with you to ensure you are always operating at maximum security.

Proactive support – We learn your organisation inside-out and advise, design, supply and implement the technology required to achieve your desired outcomes.

Value for money – Covering governance, strategy, technology and operations, our multi-disciplinary service fills any skills gaps you may have, providing a single point of contact for simplicity and efficiency.

Bespoke guidance – Rather than a 'one-size-fits-all' model, we guide and advise according to what's best for you. Our experts take time to understand your organisation and business requirements.

Regular reports – We offer quarterly or monthly assessments and bi-weekly calls, producing regular reports to monitor and demonstrate progress. This will equip you with a strong business case to demonstrate the importance of your cyber security investment, and secure further buy-in, if required.
