

MICROSOFT 365 SECURITY ASSESSMENT

Providing an audit of your Microsoft 365 and Office 365 environments against industry security benchmarks.

HOW DOES THIS SERVICE WORK?

Microsoft 365 is designed to be an open, collaborative platform which, although great for productivity, can cause security concerns. Assessing your environment will provide recommendations to ensure you remain secure.

Our security assessment has been developed to audit your Microsoft 365 and Office 365 environments against existing industry-leading security benchmarks created by the Centre for Internet Security (CIS). We review over 80 individual items, covering nine security areas including Azure AD identity and access management, application permissions and authentication as well as data management, email security and mobile device management. We also look at your auditing and storage processes, before providing best practice recommendations.

BENEFITS TO YOU

People

Collaborative working has become the norm, but with greater collaboration comes greater potential for security breaches. The Microsoft 365 Security Assessment is here to mitigate this. By understanding your business objectives and drivers, the Microsoft 365 Security assessment will identify potential security pitfalls, before providing you with a detailed report which highlights best practice recommendations to keep your people and systems secure.

Technology

Our Identity and Access Management, Threat Protection, Information, Protection and Governance and Cloud Security Advanced Specialisations, ensure that we can work with you to deliver expert advice on maturing your security posture. Our technical consultants will carry out your assessment onsite or remotely and are available throughout to answer any questions you may have.

Commercials

Microsoft product sets allow for a reliable, flexible, and secure IT environment meaning you can maximise securing your workplace, whilst reducing risk to your business. We have Microsoft Advanced Specialisations across Azure, Modern Work and Security, amongst others and work to CIS benchmarks in our recommendations, meaning you are in safe hands with us.

SUITABLE FOR YOU IF...

- ✓ You are an existing Microsoft 365 customer. It will provide most value to those with Microsoft 365 E3 and E5 licences.
- ✓ You are concerned about the security of your Microsoft 365 environment.
- ✓ You are looking for the most current best practice security guidance and advice.
- ✓ You'd like reassurance surrounding your security.
- ✓ You are looking to attain a security accreditation such as ISO:27001 or Cyber Essentials Plus.

WORKS WELL WITH

Microsoft 365 Security Essentials

Kick-starting your Microsoft 365 security position, aligning with industry best practice standards.

ITAM Microsoft 365 Licensing Assessment

Providing a view of your current licence position and identifying areas of cost savings and optimisation within your Microsoft 365 estate.

Azure Security and Health Assessment
