# GOVERNANCE, RISK AND COMPLIANCE ASSESSMENT SERVICE

Helping you meet regulatory obligations, address key risks, and ensure your information security strategy is aligned with your business objectives.

HOW DOES THE SERVICE WORK?

We start by scoping an engagement based on your objectives and timelines. Our skilled and experienced consultants then work closely with you to deliver the agreed outcome. This can include providing a fixed block of consultancy, an ongoing engagement with agreed monthly deliverables consisting of onsite and remote working, or a fully managed service.

The security of IT within your organisation is critical, and a combination of implementing industry standards, meeting regulatory requirements and understanding security risks form a strong foundation for security management.

Complex standards and requirements need an expert approach to ensure they are met correctly. We provide expert support, looking at the policies, procedures, standards and records you need to manage and control security risks in your organisation.

BENEFITS TO YOU

People

Supporting your teams with meeting regulatory requirements. Ensuring they are applying a consistent approach to conducting IT services, accounting for the operation, and delivering the subsequent evidence. Giving them the information, they need to remain confident and compliant.

Technology

Ensuring your platforms are meeting industry standards. Governing how, when and why they are used to maximise efficiencies and ensuring information is clear. Working with you to ensure security risks are managed and adequately controlled.

Commercials

Saving your organisation time with an efficient process and the option of ongoing support, ensuring your strategy remains in line with your business objectives. Providing a cost-effective way to manage your security or privacy programme.

SUITABLE FOR YOU IF...

✓ You're looking to align your security strategy with your business objectives.

✓ You need help achieving security certifications and standards.

✓ You need a cost-effective process for managing your security programme.

✓ You're developing a security incident response plan.

✓ You're unsure which security requirements and obligations you need to meet.

WORKS WELL WITH

Cyber Essentials Plus Service

Enabling your organisation to achieve the nationally recognised Cyber Essentials Plus certification at a speed that is right for you.

Security Baseline Assessment

Providing a 'point-in-time' look at your organisation's cyber security posture in comparison with industry best practice.

Incident Response Service

Mitigating security incidents 24 hours a day, helping contain threats and minimise financial and reputational loss, whilst reducing downtime.

WHAT'S INCLUDED

Reduced risk – We offer outcome-based consulting engagements or managed services, providing you with an outsourced Chief Information Security Officer (CISO) or a Data Protection Officer (DPO).

Ongoing support – Our service provides a 12-month engagement with dedicated expert consultants to ensure you receive the support you need.

Comprehensive service – We hold ISO 27001 and Cyber Essentials certifications, so you know you're in experienced, qualified hands.

Demystifying industry standards – Our experts help you understand the requirements, walking with you to certification and ensuring you meet key obligations. We give you support to implement good governance policies.

Bespoke service – We identify and explain the key policies you need to manage security risks, aligning with your unique business objectives.
