

PUBLIC CLOUD SECURITY HEALTH ASSESSMENT - AZURE

Ensuring your Microsoft Azure environment is secure and running efficiently by identifying potential security risks and cost savings.

HYBRID INFRASTRUCTURE

HOW DOES THE SERVICE WORK?

Technical consultants armed with industry-leading tools work to uncover hidden areas of risk, assessing your Microsoft Azure environment to understand your concerns and pain points. We evaluate key areas of your environment to identify potential improvements and then focus on how to resolve them. This ensures that your workloads are aligned with the Microsoft Azure Well-Architected Framework best practice for cloud. This deep dive workshop offers detailed recommendations and suggested actions to remedy these challenges, offering cost savings and a robust security stance.

BENEFITS TO YOU

People

Keeping your cloud environment efficient and secure can take a toll on your business workloads. Our technical experts will work with you to understand how your IT team manages your Microsoft Azure environment and make recommendations on where you can increase productivity and streamline processes.

Platforms

Our Microsoft Azure experts will work with you and make recommendations to ensure your business has minimum disruption to your user's environment and a more resilient and secure IT infrastructure.

Commercial

A poorly configured cloud can lead to unprecedented costs and security risks. We take the strain out of the process with technical skill and experience to pinpoint potential cost savings. Our experts will then offer recommendations based on the areas of improvement discovered, ensuring you have a properly maintained and protected environment.

SUITABLE FOR YOU IF...

- ✓ You want to understand areas of opportunity to improve your public cloud security.
- ✓ You want to ensure you are cost optimised in your cloud environment.
- ✓ You have not reviewed your estate previously / in the last 12 months.
- ✓ You want to understand what remediations you need to take to reach best practice.
- ✓ You want to understand which remediations will provide the most significant impact on improving your environment.

WORKS WELL WITH

Public Cloud Automated Adoption Accelerator - (Azure AAA)

Provides a quick, easy, and low-cost way to take your first steps into Microsoft Azure. We help you choose the right solutions for your organisation with expert technical support, removing the complexities of your cloud journey.

Public Cloud Migration Assessment - Azure

Assesses your Microsoft Azure environment, providing high-level analysis and generating a detailed report with migration recommendations, estimated costs and a migration roadmap.

Cloud Platform Service

Optimises and manages AWS and Microsoft Azure spending, providing you with upfront cost-efficiency, guidance on cloud and software spend and centralises procurement.
