

WINDOWS AUTOPILOT IMPLEMENTATION SERVICE

Simplifying every part of the Windows device lifecycle, configuring the foundational layers needed to deliver devices.

HOW DOES THE SERVICE WORK?

Microsoft Windows Autopilot delivers streamlined, cloud-driven deployment for Windows 10 users, simplifying every part of the Windows device lifecycle, both for your IT team and end users. Our service helps you configure the foundational layers you need in order to deliver devices with Autopilot. Whether you want to pre-configure, reset, repurpose, or recover devices, it provides a secure and compliant process. We provide a pilot configuration, plus an in-depth handover so that your IT team feels confident managing the solution in the future. The service is available in two versions – standard and advanced.

BENEFITS TO YOU

People

We ensure that the setup is as seamless as possible for your users to ensure successful adoption of Autopilot.

Technology

Understanding your existing infrastructure and applications allows us to provide the best recommendations for future adoption.

Commercials

Our team will confirm that you know which licenses are required for each of the components installed to ensure that you are fully covered.

Compare our standard service option vs advanced service option, to see which is more suitable for your business needs.

	Standard	Advanced
Azure AD Configuration	✓	✓
Windows 10 Enrolment Policy	✓	✓
