AZURE MIGRATION ASSESSMENT

Showing the best way to a successful cloud migration for an optimised cloud environment.

HOW DOES THIS SERVICE WORK?

Getting the best out of your cloud is vital. It is important to choose the workloads that will benefit from migration, and those that should remain on-premises, but it's not always clear how to make these decisions.

Using sophisticated tooling we assess your environment and develop a high-level analysis of your infrastructure. Alongside this, we explore your essential business drivers and work with you to understand your key desired outcomes. It's essential to see what's getting in the way of your transition so we can develop a solution that takes the best approach to achieve your goals. As an output a detailed report shows sizing recommendations, estimated costs and a roadmap for your migration, along with expert advice.

BENEFITS TO YOU

People

Navigating the cloud can be challenging. Our highly skilled Azure migration teams will work closely with you to understand your business objectives and will tailor our service to support your users through assessment, to ultimately roadmap your route to cloud. With our depth of experience and expertise, we will review what works best for your users and will tailor make subsequent solutions that match the needs of your organisation and people.

Platforms

We will assess and analyse your infrastructure and compare this with the business drivers we've identified. Our Microsoft experts will review your workloads and identify any inefficiencies, to ensure the path to the cloud which we recommend considers the best action for your environment.

Commercial

Our team will provide a detailed report with advice, estimated costs and recommendations to highlight the benefits of any proposals so there are no surprises. We look at the bigger picture of your environment, not just a point in time, to ensure you have everything you need to embark on your cloud journey.

	Standard	Medium	Large	Extra Large	Bespoke
Maximum number of server workloads	Up to 50	51 - 100	101- 150	151 - 200	Unlimited
Maximum number of VM hosts	6	6	20	20	Unlimited
Maximum number of SQL server workloads	5	5	10	10	Unlimited
Dependency mapping included	✓	✓	✓	✓	✓
Physical server workloads included	✓	✓	✓	✓	✓
Clustered workloads included	✓	✓	✓	✓	✓
Virtual desktop environment analysis	✗	✗	✗	✗	✓
Supported hypervisors	VMware vCenter / Hyper-V				Any
Server workload operating systems	Windows Server 2008 R2 and above				Any

SUITABLE FOR YOU IF...

✓ You are looking to move to Azure

✓ You want to make the most of your cloud environment

✓ You need expert advice and help with migrating to Azure

✓ You're not sure which workloads belong on-premises or in the cloud

✓ You need advice to help create an efficient and cost-effective cloud environment

WORKS WELL WITH

Azure Strategy Advisory Service
Understand your strategy for moving to cloud.

AVD Adoption Accelerator Service
Speed up deployment of AVD in Azure, including a pilot deployment, with building and configuration from our in-house experts.

Azure AAA Service
Simplifying your cloud journey with a standardised, automated deployment of Azure.

WHAT'S INCLUDED

Initial assessment – We analyse your infrastructure to see the bigger picture from which to offer advice.

Understanding your drivers – Looking at the wider picture, considering business goals and objectives and what's hindering progress.

Tailormade solution – Every solution we create is bespoke to the needs and requirements of your organisation and people.

Clear reporting – Detailed reports, advice, estimated costs and recommendations to show the benefits of any proposals.

Expert advice – Our team are Microsoft experts, skilled in Azure migrations with experience in identifying efficiencies.
