

M365 DISCOVERY & OPTIMISATION ASSESSMENT – POWERED BY ZLURI

A comprehensive assessment of your M365 estate powered by Zluri, our market-leading SaaS tool. The service provides a customised report that offers a clear view of your M365 usage, highlighting potential cost savings and giving recommendations.

HOW DOES THE SERVICE WORK?

We assess your SaaS estate and capture both usage and entitlement data. This enables us to establish an accurate picture of all your M365 subscriptions.

By analysing this information, we provide an assessment of your M365 estate, capturing application and component data. By incorporating usage data, we drive optimisation, considering areas such as component applications, non-activated user assignments, duplicated accounts and service or admin accounts which could have been over-licensed. We also look at the level of consumption for each of your M365 subscriptions.

BENEFITS TO YOU

People

Our tailor-made actionable recommendations give a clear picture of your existing M365 licence standpoint. This allows you to ensure the correct licences are in place to support your organisation's workstyles and needs.

Technology

The assessment presents your current state, showing you where licences are not being used or have not been activated. A view of the applications in use provides a detailed picture to ensure the best-suited licences are in place.

Commercials

A detailed view highlights opportunities for right-sizing, cost savings and maximising investment. This ensures the effective and efficient use of M365 licences to enable your organisation to achieve its goals.

SUITABLE FOR YOU IF...

- ✓ You want to plan and use your M365 licences as effectively as possible.
- ✓ You need to improve budgeting around your M365 spend.
- ✓ You want to experience what Zluri can offer to help you manage your M365 estate.
- ✓ You want better visibility of your contract renewal management.
- ✓ You want to ensure you are maximising your return on investment by utilising all available technology.

WORKS WELL WITH

SaaS Discovery & Optimisation Assessment

Softcat can assist with renewals and Shadow IT, delivering a report identifying inefficiencies, cost savings, and optimisation opportunities. We consider your future expansion plans and provide recommendations to optimise your software spend based on projected growth, helping you budget better and reduce expenses.

Cloud Fundamentals Service

Do you want to get control of your cloud spend? Never worry about spiralling costs, as our Cloud Intelligence Team optimises your spending and provides best-practice cloud resource management.

SaaS Platform Service

Offers a web-based portal for a complete SaaS management solution, enabling optimisation, entitlement management, and spend reporting across all vendors, whilst Softcat's Intelligence Service Team provides support to ensure you get the full value from your service.

WHAT'S INCLUDED

A clear view – We provide an effective licence position across your desktop estate for M365, giving an accurate picture of your current licences.

Bespoke feedback - A detailed report is produced by our team of experienced consultants, highlighting all efficiencies and cost-saving opportunities available.

Detailed assessment - We provide a comprehensive overview of your M365 estate, detailing your cloud and locally installed estate.

Optimisation advice - We look at rightsizing subscriptions, providing a view of all unused licences and duplicated users and identifying possible downgrade candidates by delivering a full breakdown of individual users' component usage. We recommend the most suitable subscription level for you.
