

# BETTER PROTECT YOUR BUSINESS

## SOFTCAT INTELLIGENCE SERVICES

### Gain complete visibility

With Shadow IT a growing concern, it is vital to understand your business vulnerabilities.

Softcat Intelligence Services provide a single source of truth for all your IT assets, drawing your attention to areas of concern and allowing you to protect against security and compliance liabilities – **because you can't manage what you can't see.**

### Customer challenges & market insights

## 39%

of UK businesses identified a cyber attack in 2022.<sup>1</sup>

## 31%

of businesses estimate they were attacked at least once a week.<sup>2</sup>

## 4300<sub>hours</sub>

IT and security teams spend an average of 4,300 hours annually achieving or maintaining compliance.<sup>3</sup>

## 35%

of companies reported having more than 1,000 vulnerabilities in their IT environment.<sup>4</sup>

## How Softcat Intelligence Services help you better protect your business

### Improve your security stance

Softcat's services provide visibility of software on your estate, allowing you to report on versions, patches and potential vulnerabilities, enabling you to improve your security stance.

### Reduce software footprint

We help to reduce threat vectors (routes that malicious attacks may take to get past your defences) by lowering the software footprint on your estate, minimising risk exposure.

### Manage shadow IT

Softcat's services can provide visibility into unknown SaaS exposure, enabling you to manage shadow IT effectively.

### Proactively manage risks

We can help you proactively manage the risks associated with using third-party code by providing special attention to rogue end-user license agreements.

### Ensure compliance

We work to complement your security and compliance strategies. We help you pass software audits and accreditations by providing visibility of your IT estate so you can easily check that all software is up-to-date and used compliantly.

## Individual services to explore

### SAM Intelligence Service

Provides you with complete visibility of your software estate so you can identify and manage potential risk areas. Gain access to a platform containing reliable data, including up-to-date licence positions supporting the renewal management process to ensure compliance.

### Long Tail Assessment

Offers visibility into installed applications, allowing you to track them and avoid shadow IT. Additionally, we provide categorisation, usage information and support details, including end-of-life and support dates, to ensure compliance.

### SaaS Discovery & Optimisation Assessment

Analyses your SaaS subscriptions and usage data to identify potential security risks, like unapproved or unsecured apps, and suggests actions to mitigate them while ensuring regulatory compliance.

### Snow Platform

Brings together all your software and hardware assets, allowing you to identify any unauthorised assets and ensure compliance with license agreements.

### ITAM Maturity Assessment

Instils compliance by comparing policies and procedures with ISO standards, providing insight into how well they perform against best practices for software and hardware management.

## Softcat Intelligence Services

Softcat Intelligence Services are designed to help you understand and optimise your technology estate. Our data-driven IT Asset Management (ITAM) Service provides you with true visibility and complete control of all your IT assets and licenses, whether on-premise or in the Cloud.
