

SECURITY CONTINUOUS ASSURANCE

A continuous tailored service designed to improve your organisation's security maturity. Includes risk-informed data-driven assessments and options of threat exposure management, with a vCISO Service wrap for continuous engagement.

HOW DOES THE SERVICE WORK?

All of our SCAs are led by our experienced cyber security assessors who leverage advanced tools to deliver data-driven insights tailored to your organisation's challenges. The assessments are aligned with recognised frameworks, including CIS, NIST, CAF, ISO27001, DORA and more.

Included is our vCISO service that delivers expert guidance in crafting robust security strategies, managing risks, ensuring compliance, overseeing security programs, and responding to incidents. This comprehensive approach safeguards your organisation against cyber threats while aligning security initiatives with your business goals.

All our SCAs are delivered on a continuous basis, and we build a plan that's tailored to your organisation and aligned with your business objectives to help track and recognise progress.

We also have a range of optional add-ons that can be included based on your requirements, including:

- Crisis Simulation – Test your organisation's readiness with cyber crisis simulations. From incident response training, crisis management drills and threat detection exercises to ensure your team is prepared.
- Supply Chain Risk Assessment - The evaluation and mitigation of vulnerabilities introduced by suppliers and third-party vendors to protect against potential supply chain-related cyber threats.
- GRC Tooling Selection - Assists you with choosing and implementing the most appropriate governance, risk management, and compliance tools to effectively manage cyber threats and meet regulatory requirements.
- Threat Exposure Management - Providing a holistic and proactive approach to managing cyber security risks to help you validate existing controls and stay ahead of emerging threats and vulnerabilities.

BENEFITS TO YOU

People

Gain access to seasoned cyber security experts and our vCISO service, providing tailored strategies that align security initiatives with your business goals while safeguarding against cyber threats.

Technology

Leverage advanced tools and technologies to obtain data-driven insights and proactive threat management, ensuring robust protection against evolving cyber risks.

Commercials

Benefit from flexible, continuous, and customised solutions that align with your objectives, offering measurable progress and cost-effective security enhancements.

SUITABLE FOR YOU IF...

- ✓ You require continuous, tailored security assessments aligned with recognized frameworks like CIS, NIST, ISO27001, and others.
- ✓ You seek to enhance your cyber security posture with services like crisis simulations, supply chain risk assessments or threat exposure management.
- ✓ You require assistance with selecting and implementing effective governance, risk management, and compliance (GRC) tools.
- ✓ You want to leverage advanced tools and technologies for data-driven cyber security insights.
- ✓ You aim to align security initiatives with your business objectives and track measurable progress over time.

WORKS WELL WITH

Managed XDR for Microsoft Sentinel

Our Managed XDR (MXDR) for Sentinel Service combines threat protection, security intelligence and automation of the Sentinel security platform and Defender product portfolio with expert monitoring and management by Softcat's Security Operation Centre.

Managed Firewall Service

Taking on the day-to-day management of your firewall infrastructure, whether it's on premises, or in a public or private cloud.

Threat Exposure Management Service

Providing a holistic and proactive approach to managing cyber security risks, helping you validate existing controls, stay ahead of the emerging threats and vulnerabilities.

WHAT'S INCLUDED

Comprehensive Framework Alignment - Our assessments align with recognised standards like CIS, NIST, CAF, ISO27001, and DORA to ensure industry-best practices.

Expert-Led Assessments - Experienced cyber security professionals lead the process, utilising advanced tools for precise, data-driven insights.

Inclusive vCISO Service - Access to our virtual Chief Information Security Officer provides expert guidance on security strategy, risk management, compliance, and incident response.

Continuous and Tailored Approach - We offer ongoing assessments with plans customised to your organisation's objectives, enabling you to track and recognise progress over time.

Optional Add-Ons for Enhanced Security - Enhance your cyber security posture with additional services like crisis simulations, supply chain risk assessments, GRC tooling selection, and threat exposure management.
