

Power up your performances

Level up the employee experience with intuitive Windows 11 and Softcat expertise.

Get more from your move

With Windows 11, you gain a powerhouse of productivity to reinvent the modern workspace. It gives your people everything they need (and want) to succeed, and that helps your business move onwards and upwards.

Whether you're already embracing what's possible with its intuitive user features and next-level business security, or considering making the move soon, there are several migration considerations. So, you may need some support to get the most out of it.

Softcat is here to help you enjoy Windows 11 to the fullest; advising, architecting and implementing complementary technology and services - so you can achieve what you need to.

Explore the personas

Click on the persona that best represents your users to discover which Windows 11 features they could benefit from, and some example devices and desk setups that could suit their workstyle.

High performance users

High performance users are most often located in the office, but have the ability to work from home. They need access to high-powered applications to work on large files.

Mobile users

Mobile users travel extensively or attend multiple meetings. They typically present in one or more locations across the week, and are heavily reliant on email.

Office workers

Office workers spend a large proportion of their time in the office working at their desk. They may attend meetings during the day but rarely travel.

High performance users

For your colleagues who need seamless access to high-powered applications and large files, as well as the ability to easily collaborate with internal – and potentially external – teams.

The features of Windows 11 that will be beneficial to high performance users are:

Optimised performance

Windows 11 has a range of optimised performance improvements – including prioritisation of apps and processes, reduced disk footprint and instant resume from sleep.

Performance power plan

This Windows 11 power plan is designed to deliver constant high-performance levels – ideal for colleagues with latency-sensitive workloads.

Hardware compatibility

Featuring seamless integration with newer hardware, Windows 11 provides a more efficient, responsive user experience.

Help high performance users work at their best, each day, with the following devices and supporting accessories.

High performance users

DELLTechnologies

Dell Pro Max 14 Premium

Power through CAD, 3D modelling and large-file engineering work from any location. The Pro Max 14 Premium pairs Intel Core Ultra processors with NVIDIA RTX graphics options, so renders, simulations and AI-assisted workflows keep moving when you do. A serious workstation in a 14-inch chassis.

intel

Mobile users

For your colleagues that spend most of their time on the road travelling between locations or working environments. They are highly mobile and need to have the ability to work or attend meetings from anywhere.

The features of Windows 11 that will be beneficial to high performance users are:

Phone Link app

This app allows users to access text messages and photos from their phone directly on their PC - allowing for seamless transitions between devices when working on the move.

Window Hello

Perfect for users that need security when working in varied locations, Windows Hello allows biometric authentication methods like fingerprint scanning and facial recognition to level up protection for hybrid workers.

Help mobile users work at their best, each day, with the following devices and supporting accessories.

Mobile users

DELLTechnologies

Dell Pro 14 Premium

A 14-inch Copilot+ PC built for the road. Intel Core Ultra 7 268V, 32GB memory and 512GB storage carry multi-app meeting days, while on-device AI keeps Copilot, transcription and meeting summarisation responsive when the connection drops. Wi-Fi 7 and a full-day battery round out the mobile kit.

Office workers

For your colleagues that are predominately desk-based, in a single, regular office location. They will need to be able to collaborate with clients, suppliers and their colleagues, and may occasionally work from home, but this won't be their norm.

The features of Windows 11 that will be beneficial to office workers are:

Improved user interface

The modernised Windows 11 user interface includes an easier to navigate Start Menu with simpler ways to find apps and recommended documents. This results in a better experience for users who interact with these elements every day.

Snap Groups

With Windows 11, users can organise open windows into groups, snap them to specific screen areas and toggle between them with ease. This can improve productivity and simplify multitasking for busy teams.

Windows Hello

For added in-office protection, Windows Hello allows users to deploy biometric authentication methods like facial recognition and fingerprint scanning to log in simply and securely.

Help office worker users work at their best, each day, with the following devices and supporting accessories.

Amplify your experience with Softcat services

Softcat's experienced Workspace and Microsoft Specialists help you to make the most of your technology investments. Better understand when and where Windows 11 is right for you and have a smooth and effective migration from Windows 10.

Our experts take a deep dive into your infrastructure and licensing to see what's needed to optimise your migration, and build a happy, healthy, modern workspace. We hand pick compatible devices that are the right fit for your infrastructure and people - based on our knowledge and long-standing partnerships with a broad range of technology vendors.

Our services can:

- Identify areas for cost saving and prioritise investment
- Fill any skills gaps in best practice and delivery
- Enhance user experience
- Reduce risk in migration

Services to consider:

Voice of the user survey to support device selection, user persona mapping and workstyle analysis

Application Packaging Services to support application compatibility and delivery

DEX Service to support digital experience strategy, device performance and hardware selection

Managed Device Lifecycle to support business-as-usual JML activity

Autopilot Accelerator Service to help with Autopilot migration and Intune management

Migration Services to support with project based device refresh

Build your modern workspace around Windows 11

Whatever you want to get out of Windows 11
– we're here to make sure you achieve it.

Speak to your Softcat Account Manager to find out more or to arrange a Windows 11 Workshop with one of our Workspace Specialists.
