2018 financial review

Graham Charlton, CFO
Strong revenue and gross profit growth reflect successful execution in a buoyant market.

Gross margin slightly down year on year reflecting strong performance by our public sector partner business and consequential small shift in mix.

Gross profit growth well ahead of expectations entering the year, especially during second half of the financial year when growth accelerated to 34%.

Growth in the cost base reflects our on-going investment in people across all areas of the business, together with increased commission costs associated with the rise in gross profit.

The ratio of OP to GP increased markedly due to very strong growth in the latter. Further people and systems investments in the coming year are expected to reduce this metric in FY19.

Share-based payment charges increased during the year due to maturation of the share schemes put in place on IPO, together with a crystallisation of LTIPs related to the CEO change. The SBC charge is expected to be relatively stable in FY19.

The effective tax rate is 19.3% (FY17: 20.3%). The reduction is due mainly to the decrease in the blended corporation tax rate from 19.7% to 19.0%.

The ETR is slightly higher than the statutory rate of 19.0% because of non-deductible expenses.

Cash flow

- Capital expenditure requirements have remained limited, and mainly relate to general office and computer equipment requirements. A slight increase in capital spend is anticipated in FY19.

- The net working capital movement reflects growth in receivables and payables broadly in line with P&L growth, indicating a consistent business model.

- Cash conversion is broadly in line with prior period and we continue to target a long-run average in the range of 90-95%.

- £38.8m payment in H1 FY18 represents FY17 full year ordinary dividend of 6.1p and FY17 special dividend of 13.5p per share. £6.5m payment in H2 FY18 represents the interim dividend of 3.3p per share.

Closing remarks

Graeme Watt, CEO
Summary

- Our simple strategy remains unchanged and continues to serve us well
- Market conditions were particularly buoyant
- Strong growth also reflects some further gains in market share
- All business lines, customer segments and branches performing well
- Cash conversion maintained, dividend policy maintained
- Continued investment in people and capacity for future growth
We benefited from exceptional market conditions in 2018. Despite current political and economic uncertainty, and notwithstanding tough comparative figures, we are confident of achieving further profitable growth in 2019. Trading in the first ten weeks of the new financial year has been encouraging.
