PUBLIC CLOUD SECURITY HEALTH ASSESSMENT – AWS

Ensuring your AWS environment is secure and running efficiently by identifying potential security risks and cost savings.

HOW DOES THE SERVICE WORK?

Technical consultants armed with industry-leading tools work to uncover hidden areas of risk, assessing your AWS environment to understand your concerns and pain points. We evaluate key areas of your environment to identify potential improvements and then focus on how to resolve them. This ensures that your workloads are aligned with the AWS Well-Architected Framework best practice for cloud. This deep dive workshop offers detailed recommendations and suggested actions to remedy these challenges, offering cost savings and a robust security stance.

BENEFITS TO YOU

People

Keeping your cloud environment efficient and secure can take a toll on your business workloads. Our technical experts will work with you to understand how your IT team manages your AWS environment and make recommendations on where you can increase productivity and streamline processes.

Platforms

Our AWS experts will work with you and make recommendations to ensure your business has minimum disruption to your user's environment and a more resilient and secure IT infrastructure.

Commercial

A poorly configured cloud can lead to unprecedented costs and security risks. We take the strain out of the process with technical skill and experience to pinpoint potential cost savings. Our experts will then offer recommendations based on the areas of improvement discovered, ensuring you have a properly maintained and protected environment.

SUITABLE FOR YOU IF...

✓ You want to make the most of your cloud environment.

✓ You are concerned about potential security breaches.

✓ You are looking for cost savings within your AWS environment.

✓ You need a robust plan to make efficiencies within your AWS environment.

✓ You are looking to expand your AWS footprint and want to ensure that the existing environment is built to best practice.

WORKS WELL WITH

Public Cloud Automated Adoption Accelerator - (AWS AAA)

Provides a quick, easy, and low-cost way to take your first steps into AWS. We help you choose the right solutions for your organisation with expert technical support, removing the complexities of your cloud journey.

Public Cloud Migration Assessment - AWS

Assesses your AWS environment, providing high-level analysis and generating a detailed report with migration recommendations, estimated costs and a migration roadmap.

Cloud Platform Service

Optimises and manages AWS and Microsoft Azure spending, providing you with upfront cost-efficiency, guidance on cloud and software spend and centralises procurement.
