

SAAS INTELLIGENCE SERVICE

Proactively manages your SaaS estate, providing visibility of renewals, spend forecasting, and Shadow IT. Automates your Joiners, Movers and Leavers processes, all powered by Zluri, our market-leading SaaS tool.

HOW DOES THE SERVICE WORK?

We assess your SaaS estate and capture both usage and entitlement data. This enables us to establish an accurate picture of all your SaaS subscriptions. By analysing this information, we provide monthly reports providing application and component data.

By incorporating usage data, we drive optimisation, considering areas such as component applications, nonactivated user assignments, duplicated accounts, and service or admin accounts that could have been over-licensed.

Streamline your Joiners, Movers, and Leavers processes using automated workflows. These workflows guarantee that departing users lose access to crucial company data while new arrivals promptly receive their licenses, ultimately saving you valuable resource time and money.

BENEFITS TO YOU

People

Softcat's experts help you manage your service to achieve the best return on your investment. We help ensure you successfully discover all the SaaS applications used in your business to get complete visibility of your SaaS estate and its real-world usage levels.

The service is especially helpful in helping manage joiners, movers and leavers (JML) so you can ensure your licences match the true number of users in your business.

Technology

Detect duplicate services that fulfil similar functions, for example, in areas like messaging.

The service also probes your SaaS apps to identify potential security risks – based on metrics including previous events, shared data, and compliance obligations – so you can close down vulnerabilities.

Commercials

You can identify duplicated technologies and capabilities to consolidate vendors and reduce licence costs, as well as eliminate unused instances or unallocated resources to optimise spend.

Track, manage and predict SaaS spending throughout your business with comprehensive reporting on all SaaS vendors and services, and get alerts when licence agreements are ending to forecast and optimise renewals and achieve cost-savings wherever possible.

SUITABLE FOR YOU IF...

- ✓ You want to control and manage your SaaS spend.
- ✓ You need better visibility around renewal management.
- ✓ You want to better control and manage your Shadow IT.
- ✓ You want to see under/over provisioning of licenses.
- ✓ You wish to automate your Joiners, Movers and Leaver processes.

WORKS WELL WITH

Cloud Fundamentals Service

Softcat's Cloud Fundamentals Service delivers full visibility of an organisation's cloud governance. The service is designed to complement an organisations internal CloudOps team, providing valuable insight into its multi-cloud use, whilst also offering regular workshops with Softcat's highly experienced cloud architects.

Cloud Licensing Optimisation Assessment

With our help, customers can optimise the cost-effectiveness of their Azure Hybrid User Rights licenses and take advantage of any BYOL (bring your own licence) opportunities.

License Baseline & Optimisation Assessment

We provide a view of our customers' current licence position to help them identify potential cost savings and optimisation within their IT estate.

WHAT'S INCLUDED

Access to our Zluri SaaS Platform - providing a clear view of your SaaS estate.

Bespoke reporting – one of our experienced licensing consultants will be assigned to provide monthly reporting highlighting all efficiencies and cost-saving opportunities available.

Optimisation advice – we look at rightsizing subscriptions, providing a clear view of all unused licenses and duplicated users. We recommend the most suitable subscription level for you.

Dedicated CSM team - to ensure you receive all the support and advice you need.

Onboarding / Offboarding Automation - Streamline JML process management with automated workflows. Ensure users that have left the organisation lose access to critical company data while new hires seamlessly receive their licenses, optimising efficiency and cost-effectiveness.
