

Softcat Plc

ENERGY POLICY STATEMENT

Softcat Plc has committed to operate a formal Energy Management System as part of our integrated Environmental and Energy Management System to the requirements of the International Standard ISO 50001:2011 in order to achieve energy performance improvement and to commit to continual improvement in this discipline.

The scope of the Energy Management System is the application of an energy management system for the use of energy within occupied premises, offsite data centers and company transport for the delivery of IT infrastructure and services to the corporate and public sectors.

To deliver this, Softcat Plc will provide the necessary resources and provide measured information to achieve objectives and targets, which will be formally set and reviewed.

We will meet legal requirements applicable to our energy management and any other related requirements to which Softcat Plc subscribes.

Our energy management system will support the purchase of energy efficient products and services, plus the commissioning of any design related to our energy performance improvement.

The energy management system will be documented and communicated to all levels of Softcat Plc staff.
