

# MIMECAST

## Partner overview

Mimecast is an international email management company based in London that is dedicated to making email safer for businesses. Founded in 2003 and with an international footprint, Mimecast's security, archiving and continuity cloud services protect business email and deliver comprehensive email risk management in one fully-integrated subscription service. With over 18,000 customers and millions of users worldwide, its groundbreaking technologies reduce the risk, cost and complexity traditionally associated with protecting email with users, offering a solution so you no longer need to manage disjointed point solutions from multiple vendors.

## Why Softcat for Mimecast

As the number one Mimecast partner globally, Softcat is at the forefront of Mimecast services and is considered a leading authority in their technology. This enviable position affords us priority access to wider Mimecast resources, privileged insight into future developments, greater commercial flexibility and means our people are always up to speed with all things Mimecast.

## Solutions we offer

### Datacentre

Mimecast's platform is delivered 100% in the cloud – that means no more on-premise technology for the security, archiving and protection of email. Whether you need to run Mimecast concurrently with on-premise email deployment, or use a cloud service like Office 365, it seamlessly integrates to guarantee 100% uptime of email, instant and unlimited archiving, unrivalled security and offers advanced features to improve mobile working.

### End User Computing & Mobility

Mimecast services have the potential to dramatically improve End User Computing and Mobile working practices through unique functionality delivered alongside both traditional and cloud-based email systems.

### Networking & Security

Mimecast includes Advanced Threat Protection covering anti-virus, anti-spam and email filtering, plus Targeted Threat Services for protection from the most sophisticated threats to ensure end users are not subject to weaponised attacks, or even fraudulent email.

### Services

Our strong relationship with Mimecast, and broad experience with its services has seen Softcat become experts across the entire Mimecast portfolio.
