Partner overview

Citrix is an American software company, located in Fort Lauderdale, Florida that provides server, application and desktop virtualisation, networking and cloud computing technologies. For over 30 years Citrix has been driven by an ambition to create technology that makes access to applications and data secure and easy. Inspired to power a connected world that joins up people and organisations, their technology brings together cloud, mobility, applications and data, enabling people to work anywhere, anytime. Today, more than 400,000 organisations around the world choose to use Citrix for secure access solutions.

Why Softcat for Citrix

Working closely with our customers to understand their desktop strategy is becoming more and more important. Our in-depth understanding of the end-to-end solution that Citrix offers enables us to advise, implement and support many customers in optimising their environments and the service levels that they provide to their users.

Partners Since

Team Size

Solutions we offer

Software Licensing

Softcat has an excellent knowledge of Citrix's variety of licensing programs and understands how to give our customers the best licensing for their solutions.

End User Computing & Mobility

Citrix pioneer technologies that virtualise applications and desktop and the user experience is equal, or often superior, to traditional PC-client architectures.

Networking & Security

Using Citrix's software-defined networking technologies, applications run faster and are delivered more securely and reliably.

Datacentre

Citrix technology powers exceptional end user computing services direct from the datacentre, whether that's on-premise, off-premise, or using public cloud platforms.

Services

Softcat provide a range of services to help organisations provision and manage their Citrix products within an existing infrastructure.
