

CHECK-POINT

Partner overview

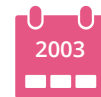

Check Point Software Technologies Ltd is the largest pure-play security vendor in the industry. Since they broke new ground with their FireWall-1 and its patented stateful inspection technology, Check Point has continued to protect customers from every type of cyberattack imaginable, receiving industry acclaim for their fast response times to emerging threats. Today, they protect some of the world's most sensitive networks and heavily invest in research and development. Irrespective of how your infrastructure is built, Check Point can be deployed on-premise, virtually or physically, in private or public cloud, and onto every mobile device.

Why Softcat for Check-Point

Softcat holds Check Point's highest partner accreditation and is one of only three Elite Partners in the UK. As partners for over 15 years, we have invested heavily in a technical team to advise on, deploy and support Check Point solutions.

Softcat Team Size

Partners Since

UK Partner Level

4* Elite Check Point partner	In-house Check Point specialists	Softcat Check Point Managed Firewall Service	Softcat Check Point Support Service	Check Point certified support partner	Check Point Certified Managed Services Provider
	Highest number of Check Point Security Masters in Europe		24/7/365 support with service		

Solutions we offer

Software Licensing

Obtaining Check Point licensing can be complicated and requires a wealth of knowledge of its existing programmes and technology to better inform decisions.

Datacentre

Check Point technology was born as an enterprise-grade data centre firewall and is known for its heritage in ultra-fast firewalling in this arena.

Services

Softcat provide a range of services to help organisations provision and manage their Checkpoint products within an existing infrastructure.

Networking & Security

Check Point offers an extensive range of security solutions and serves as an excellent platform for consolidating multiple security services onto a single next-generation firewall appliance. They also offer a next-gen security platform, as well as a threat-protection platform.
