Partner overview

Based in Palo Alto, California Hewlett Packard Enterprise (HPE) is an American global information technology company specialising in the development and manufacture of innovative technology and the delivery of transformative IT Services. HPE newly formed in 2015 following the split of technology giant Hewlett Packard into two separate companies and has a long heritage in the development of Enterprise Server, Storage and Networking technology and associated software. Combined with its extensive service capability HPE help organisations transform their business by adopting more efficient IT infrastructures, protecting digital assets, empowering a data-driven culture and enabling a productive workforce.

Why Softcat for Hewlett Packard Enterprise

Softcat has a proven record of accomplishment with HPE that recognises us as an industry leader in the delivery of exceptional solutions spanning Infrastructure, Datacentre, Networking and Cloud. With Certified HPE professionals in each core area we can deliver a solution from design through to deployment, taking full responsibility for what a customer would like to achieve.

Solutions we offer

Datacentre

HPE leads innovation in hyper-converged systems and flash-optimised data storage, critical components in enabling powerful compute and hybrid storage infrastructures. This not only results in instant application provisioning and agile service delivery, but delivers significant cost-savings in energy consumption and operational spend.

End User Computing & Mobility

HPE technology has the potential to play an integral part in the stable but flexible infrastructure required for modern end-user computing environments.

Services

HPE is one of the world's largest services organisations unifying global reach with unrivalled expertise to power IT transformation.
