

# MICROSOFT 365 READINESS ASSESSMENT

Providing a structured assessment and overview of your existing infrastructure to evaluate your readiness for Microsoft 365 migration.

DIGITAL WORKSPACE

## HOW DOES THIS SERVICE WORK?

We provide a structured assessment of your existing IT environment, looking first at your business objectives and any blockers that may be obstructing your migration. We work to understand your organisation's security requirements, risk factors and how your future plans may affect your Microsoft 365 adoption. Looking at your users' current roles and how they can be mapped to Microsoft 365 helps create a picture of your current readiness. We then prepare a report containing an overview of the existing infrastructure alongside remediation guidance and a statement of works for us to implement our recommended migration approach.

## BENEFITS TO YOU

### People

By giving you a snapshot of your existing IT environment, we can support you and your people in the thorough and successful adoption of Microsoft 365. Looking at your users current roles and how they can be mapped onto Microsoft 365, we can provide guidance on how ready you really are to integrate Microsoft 365 into your organisation.

### Platforms

Our point in time assessment provides a report that includes an overview of your existing IT infrastructure and remediation guidance on how best to ready your estate for migration. This ensures that the approach suggested is tailored to your exact requirements and avoids any unnecessary steps.

### Commercial

Understanding your existing infrastructure ensures that our suggested approach will make your Microsoft 365 adoption as cost effective as possible whilst reducing potential disruptions.

## SUITABLE FOR YOU IF...

- ✓ You are considering Microsoft 365 as a core part of a Modern Workplace transformation
- ✓ You want to find out more about how you can harness the benefits of Microsoft 365
- ✓ You're not sure of the best way to migrate to Microsoft 365
- ✓ You are considering using any of the Microsoft 365 services, particularly Exchange Online
- ✓ You need a reliable, flexible and secure IT environment

## WORKS WELL WITH

### Microsoft 365 Security Essentials

Kick-starting your Microsoft 365 security position, aligning with industry best practice standards.

### Azure AAA Service

Simplifying your cloud journey with a standardised, automated deployment of Azure with transparent costs.

### AVD Adoption Accelerator Service

Speed up deployment of AVD in Azure, including a pilot deployment, with building and configuration from our in-house experts.
