

SERVICES

PROFESSIONAL SERVICES

PROFESSIONAL SERVICES OVERVIEW

Our professional services offer you specific technical capability to supplement your IT team's skillset and the opportunity to free up your time to invest in other areas of your IT projects schedule. Our professional services project-based engagements range from advice and guidance, through to comprehensive solution implementation. Our team of highly certified engineering professionals and services partners cover a broad portfolio of services including public cloud, datacentre, networking, security, platforms, workplace technology, and more.

|--|--|---|--|
| <p>Cloud Assessment Service</p> <p>Softcat's Move to Cloud Assessment aligns the most appropriate, cost-effective cloud solution with your organisation's needs. We install a data collector in the background, that monitors usage from which to forecast a budget and options for cloud adoption.</p> | <p>Cloud Design Service</p> <p>Softcat's Design Your Cloud service architects the right cloud for you, tailored to your requirements. We assess your priorities and workloads before producing a secure, scalable solution for your cloud platform.</p> | <p>Cloud Health Assessment</p> <p>Softcat's Cloud Health Check Service reviews your cloud architecture, giving you an analysis from which we can recommend improvements – or give you assurance that your cloud is correctly configured. This results in a detailed report, tailored to your organisation.</p> | <p>Cloud Quick Start Service</p> <p>Softcat's Cloud Quick Start Service uses best practice techniques for access to your chosen cloud platform. Within a day (dependent on your pre-existing local security and firewalls) we can install your cloud to connect, configure, and create a secure connection.</p> |
