

SERVICES

CONSULTING AND DESIGN SERVICES

CONSULTING AND DESIGN OVERVIEW

Our consulting and design services deliver you the expertise you need to ensure that your solution is conducive with best practice and tailored to the needs of your organisation. Our team will work alongside you to ensure that the solution we propose is right for you, from the outset through to completion.

Cloud Assessment Service

Softcat's Move to Cloud Assessment aligns the most appropriate, cost-effective cloud solution with your organisation's needs. We install a data collector in the background, that monitors usage from which to forecast a budget and options for cloud adoption.

Cloud Health Check Service

Softcat's Cloud Health Check Service reviews your cloud architecture, giving you an analysis from which we can recommend improvements – or give you assurance that your cloud is correctly configured. This results in a detailed report, tailored to your organisation.

Design Your Cloud

Softcat's Design Your Cloud service architects the right cloud for you, tailored to your requirements. We assess your priorities and workloads before producing a secure, scalable solution for your cloud platform.

Go to Cloud Workshop

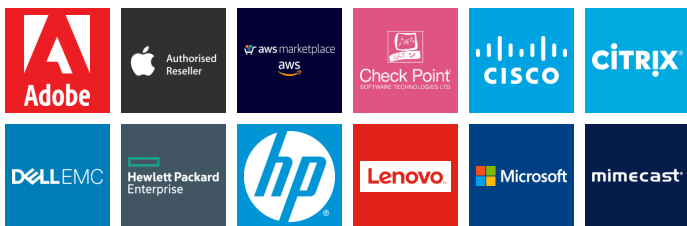

Softcat's Go to Cloud Workshop will help you move some, or all, of your IT infrastructure to the cloud. A Softcat consultant spends a day understanding your estate. The assessment uses data to identify a roadmap and projected outcomes.

Why Softcat for Consulting and Design Services?

We have a team of over 30 highly experienced solutions design consultants to provide bespoke consulting and design services. We have strong relationships with major technology vendors and work alongside you to make sure you get the right solution, with your priorities, and objectives leading the process.
