

SOPHOS

Sophos
Select
Partner

Partner overview

Softcat and Sophos have nurtured a 17 year partnership that has resulted in our recognition as a Select Partner, the highest level of partner accreditation. We are also proud to have been recognised as Sophos' Partner of the Year and Enterprise Partner to the Year in the UK 2019, as well as receiving acknowledgment from Sophos for our outstanding contribution to the delivery of its solutions. Our dedication to the protection of data, servers, virtual machines, mobile devices and endpoints, and specialist knowledge of the technology in Sophos' portfolio has earned us the position of Qualified Implementation partner for the entire Sophos product range, and its largest supplier to the UK SMB corporate market.

Solutions we offer

End User Computing & Mobility

With a complete range of Endpoint Security measures, Sophos solutions offer comprehensive protection for organisations of all sizes. Its End-User Protection Bundles in particular enable customers to gain all of the End User protection they need in a single package, with a single license, expertly supported by a single company.

Networking & Security

It's no secret that Sophos' XG Firewall and UTM are industry-leading products for network security. Sophos is renowned for its security innovation, and are constantly enhancing its existing portfolio to ensure customers are provided with the best possible solutions suited to their business.

Datacentre

Sophos Cloud is a unified cloud-based management console with which users can manage cloud security on all end-user devices while also protecting the datacentre environment.
