

NETAPP

STAR PARTNER

Partner overview

Softcat and NetApp have a long-established partnership spanning more than ten years and a dedicated team of NetApp presales consultants and implementation engineers who support a NetApp solution throughout its entire lifecycle. These specialists work seamlessly with our wider team and other technology experts, making certain we have a comprehensive understanding of the implications and requirements of a platform, informing our delivery of the solutions best suited to an environment.

Solutions we offer

Datacentre

NetApp is renowned for their ground-breaking approach to simplifying the management and storage of data. Its powerful storage systems cover a range of platforms, from virtual and database environments to backup and disaster recovery, helping customers to achieve productive, efficient and modern Data Fabric.

End User Computing & Mobility

Thanks to NetApp's mature all-flash solutions capability and unique storage efficiencies, the infrastructure responsible for an end user computing & mobility environment and the applications delivered from it is both fast and reliable.

Services

Softcat has considerable technical resource at our disposal, personnel considered experts in their field and engineers exclusively aligned to NetApp.
