COMMERCIAL SERVICES IT SOLUTIONS

Overview

Our experts in the Public Sector Commercial Services team have a specialist understanding of Government Frameworks and provide advice on the most cost-effective, compliant procurement option to suit your specific needs. Our specialists can take the complexity out of Public Sector procurement and ensure that you are able to purchase the right solution in the most efficient way.

You'll work with our **Partner Alliance Team**, who manage over 400 specialist sub-contractors. This allows our Public Sector customers to access a broad range of technologies that would otherwise be unavailable via a framework. We can also rapidly onboard partners of your choice, providing they meet our financial and technical standards. We provide an overarching prime contract, which allows your organisation to procure specialist goods and services via us. You can be safe in the knowledge that the purchase is protected by the terms of your chosen framework. This can help customers to avoid the cost and time associated with procuring outside of a Government-approved contract.

Why Softcat for Commercial Services IT Solutions?

With extensive experience working across all areas of the Public Sector, we understand the pressures on customer budgets. We work with our customers to better understand their individual needs and tailor our procurement solutions to help meet challenging savings targets and firm deadlines in delivering technology.

To find out more about how Softcat can help you transform your IT infrastructure, get in touch today and one of our Partner Alliances Team will come back to you.
